This kit contains:

- A complete kit of VAB (version T20-13)
- T20-13 system
- Complete interior
- Transparent glass windows
- A manual of assembly

In this manual of assemblage you will find:

- The manual step by step. Each picture represents a step and the parts required.
- A complete nomenclature for identification of all pieces.
- Painting indication
- And brief historic

Useful Advises:

This kit is not recommended for children under 10 years. Keep out of reach of children. They should not be allowed to ingest small pieces or manipulate the plastic bags in any way. It's recommended to use the cyanoacrylate glue and to degrease parts before gluing.

Historic:

The VAB ("Véhicule de l'Avant Blindé"), was developed in the workshops of Creusot-Loire to Saint-Chamond and is then taken by Renault Truck Defense. It entered service in the French army in 1976 and since its existence, it will be declined in many versions.

The version presented by Model Miniature is VAB armored with T20-13. It's a 20mm gun (CN-MIT20F2). The VAB is used to fight against infantry and light armored vehicles as well as for self defense against aircraft flying at low altitude.

It can be used for varied operational theaters such as Afghanistan and African wars.

Master VAB realized in print 3D,
Master armor, T20-13 and interior realized by Miss Julie Ludmann
