- The manual step by step. Each picture represents a step and the parts required.
- A complete nomenclature for identification of all pieces.
- And brief historic

Useful Advises:

This kit is not recommended for children under 10 years. Keep out of reach of children. They should not be allowed to ingest small pieces or manipulate the plastic bags in any way.

It is recommended to use the cyanoacrylate glue and to degrease parts before gluing.

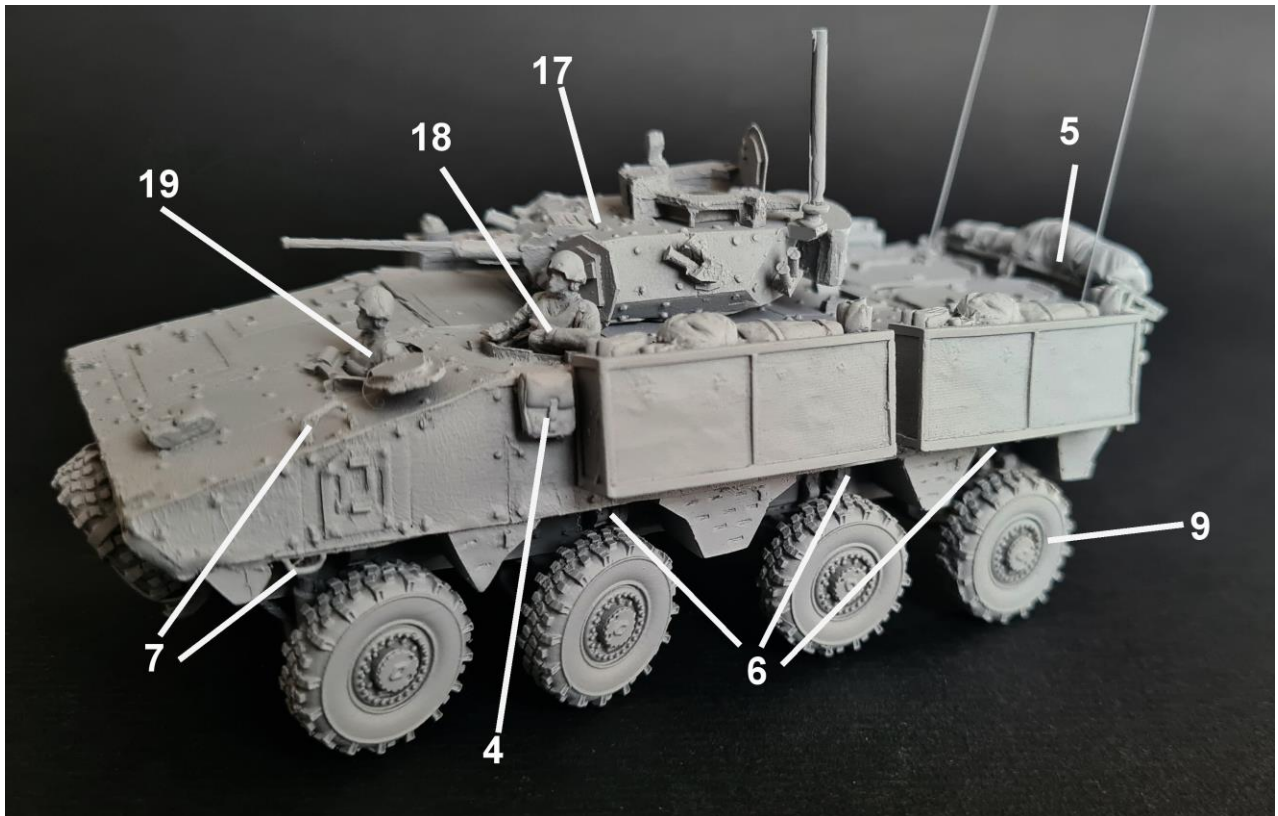

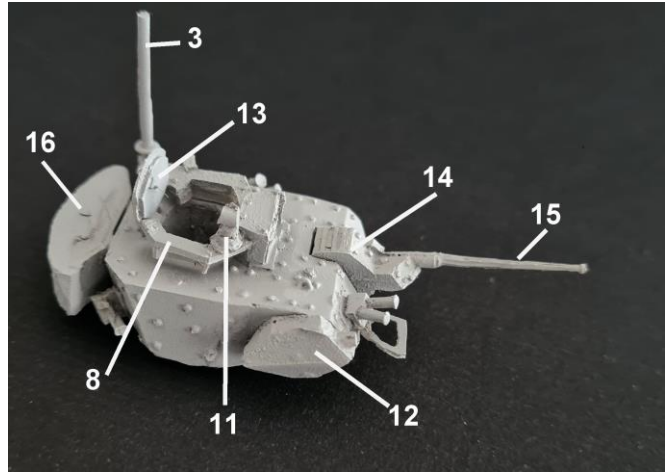

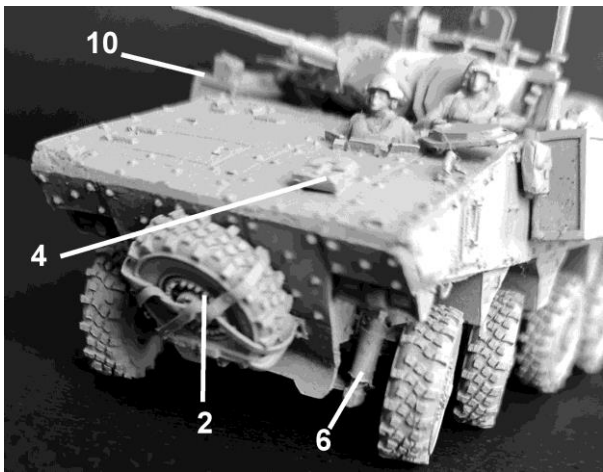

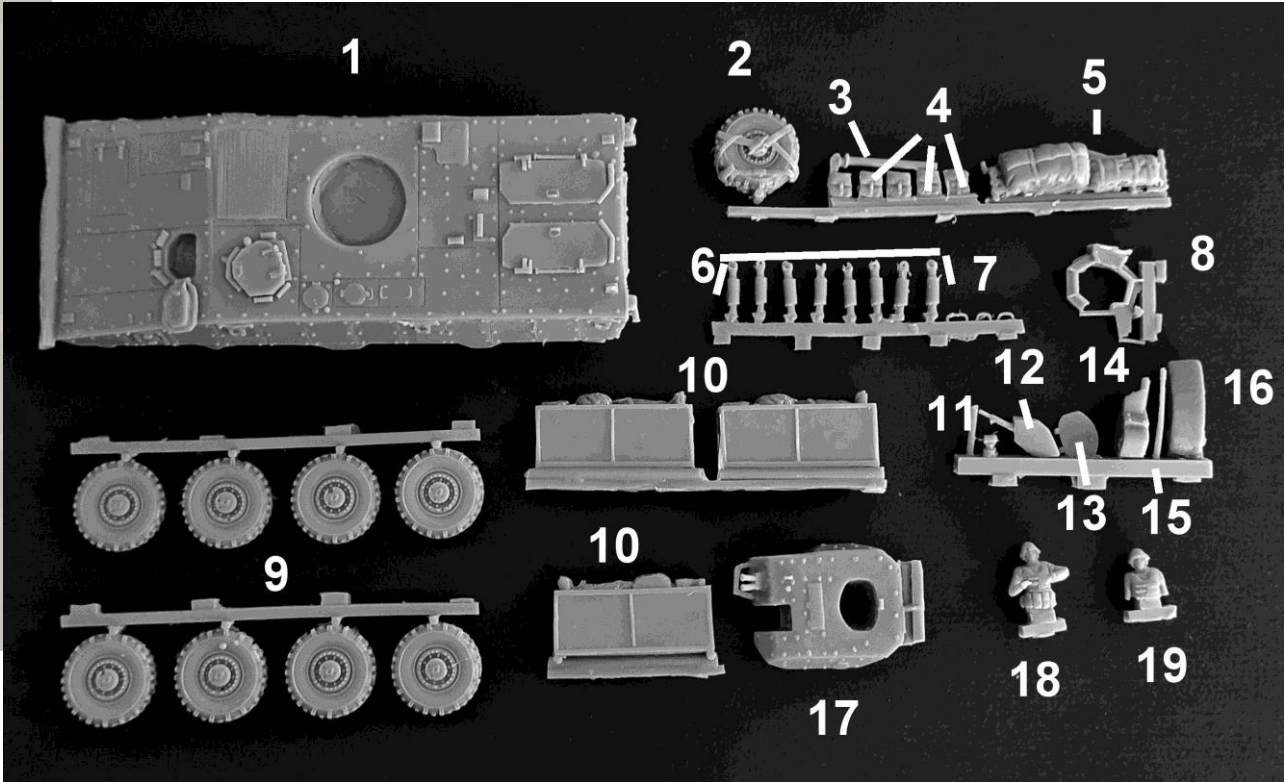

Historic:

The VBCI (MM-R139 by Model-Miniature) is an Armoured vehicle for infantry combat, designed by Nexter Systems and Renault Trucks Defense, to replace the AMX-10P (MM-R2024 by Model-Miniature).

It's used for troop carrier, protection supports for the infantry combat. It can carry 8 soldiers, 1 driver, 1 vehicle commander / gunner and 1 chief tactic.

It is equipped with a turret "Dragar" including a laser rangefinder, a thermal camera and a 25mm cannon. On the sides of the turret, a 7.62mm machine gun and grenade launchers are installed.

It entered service in 2008 in the French army and will be deployed in Afghanistan (2010) and Mali (2013). This is the version in Mali that we present to you in this kit.

- Open hatches
- 2 tank crew included
- easy kit to build
- antenna included
