This kit contains:

- A complete kit of HEMTT with loading handling system
- M-989 trailer
- functional system
- A manual of assembly

In this manual of assemblage you will find:

- The manual step by step. Each picture represents a step and the parts required.
- A complete nomenclature for identification of all pieces.
- Painting indication
- And brief historic

Useful Advises:

This kit is not recommended for children under 10 years. Keep out of reach of children. They should not be allowed to ingest small pieces or manipulate the plastic bags in any way. It's recommended to use the cyanoacrylate glue and to degrease parts before gluing.

Historic:

Built by Oshkosh (USA), Heavy Expanded Mobility Tactical Truck (HEMTT) is a 8X8 truck (M977) capable of carrying a load of 9072 kg. This is the base model, it is equipped with a handling capacity Grove, expandable to 1.135kg at 5.80 meters.

The version presented here by Model Miniature: HEMTT with loading handling system is on the same chassis M977. This hydraulic system allows the handling and transportation of goods stored on tray depositable. This system is based on the M-1120 American. The crane is built by the Israeli firm Ramat David.

Anti-rollover structure was added and an additional shield by the Israeli army.

It's used in some conflicts as in 2006 in Lebanon, in 2009 Operation "Cast Lead" and summer 2014 Operation "Protective Edge".
